Step 1, Wrap the wood in moistened towels. Moisten one or two large towels and wrap them around the wood, making sure that the entire warped area is covered. The towels you use should ideally be large enough to cover the entire wood piece. Choose towels or rags that can withstand the heat of an iron.

Often you can simply “eyeball” the best curve for the job by bending a piece of wood and using it as a template. But variations in wood grain can result in inconsistent curves. Here’s a tip to make this technique even better. Use plastic wood or a plastic molding instead. It bends very uniformly and yields near-
