Available in 1.6, 1.7,

Get Free B Series Rebuild Engine

1.8 and 2.0 Litre configurations, the B Series remains the most popular choice when performing a Honda engine swaps. The B Series was available with and without Honda's V-TEC. The engines with V-TEC are, even in OEM form, the most desirable, as the variable valve timing allows for better tuning and ultimately more torque and horsepower.

To upgrade a perfectly healthy B series unit is going to be more money than including some of the modifications during a standard rebuild. For example, the fitment of the cam, the use of

Get Free B Series Rebuild Engine

maximum oversize pistons, and the fitting of a Stage 2 head will only increase the engine rebuild cost by the extra cost of the up-rated parts.

Tuning the B Series

The first production version of the B series retained the same 1200cc capacity as the A40 engine and, superficially, appeared to be identical, with the same valve gear, same

Get Free B Series Rebuild Engine

cylinder head design, same positioning of its ancillary parts (many of which were interchangeable with the older engine) and so on. But the B-series block and head were slightly larger in both length and width and the block had thicker cylinder wall castings making the new engine heavier than the A40 motor.

Most catastrophic
engine failures can be

Get Free B Series Rebuild Engine

avoided through routine service and maintenance. In most cases, an overheating condition or broken oil pump will cause internal components to fail, which can result in a non-operable car that will require a new engine or engine rebuild.. Although it might seem easier and more cost-effective to replace your older engine, the truth is that even if the ...
