reduces starting current surge.

Centrifugal clutches are slip-free at rated load and speed. They protect against overload by limiting torque, absorbing shock and eliminating torsional resonance.

clutches today use the relatively simple but durable scooter centrifugal clutch to transfer power from the engine to the rear wheel. An automatic clutch for scooters is often referred to as a "twist & go" clutch, a popular designation reflective of its ease of operation. However there are still a few retro-styled scooters still made that use the older all-manual
