### Manual Tutorial Autodesk Combustion

From this tutorial the user will be able to get the general required guideline to conduct a combustion simulation. When considering combustion or the case of reactive flow then the 6 equations are required to be solved for the planned calculations, equations from 2 till 7 are extracted from the generic transport equation:

### ANSYS CFX Combustion - Computational Fluid Dynamics is the ...

When a Combustion Engine overheats, it turns dark red. If the Engine is not cooled in time, it explodes. BuildCraft v.2.2.0 introduced the need to cool Combustion Engines. Combustion Engines can be powered for a long time without overheating, provided you keep them cooled with water. A combustion engine will overheat very quickly if not cooled.
