General Prior to the installation of a Transair® compressed air distribution system, the installer should ensure that the installation area complies with any regulations applicable to areas exposed to explosive hazards (in particular the effect of static electricity in a silo area).

Transair Installation Guide

Prior to the installation of a Transair® compressed air distribution system, the installer should ensure that the installation area complies with any regulations applicable to areas exposed to explosive hazards (in particular the effect of static electricity in a silo area).

Transair Pipe Installation Training

Modular compressed air piping systems made of aluminum are easy to install and modify. Modern modular piping systems require minimal tools for installation and do not need heavy supports or anchoring. These systems can be installed without threading, brazing or welding, so they do not require a hot work permit.
