Wal-Mart's data warehouse, the first commercial EDW to reach 1 terabyte of data in 1992, began, like many good things, as an accident. One of the retailer's computer operators, tired of retrieving archival tapes for historical sales data, secretly "borrowed" excess storage space on a company server, where he downloaded and stored the ...

## **Wal-Mart and the Birth of the Data Warehouse**

A data warehouse is a central repository of information that can be analyzed to make more informed decisions. Data flows into a data warehouse from transactional systems, relational databases, and other sources, typically on a regular cadence. Business analysts, data engineers, data scientists, and decision makers access the data through business intelligence (BI) tools, SQL clients, and other ...
