## Eco Immunology

Ecoimmunology Ecoimmunology is an interdisciplinary field combining aspects of immunology with ecology, biology, physiology, and evolution. The field of ecoimmunology, while young, seeks to give an ultimate perspective for proximate mechanisms of immunology.

## Ecoimmunology - Wikipedia

Ecological immunology is a young field producing exciting empirical and conceptual insights into the way physiology and ecology interact in the context of disease evolution and host population responses.

Although diet is a major driver of the microbiota physiology, the gut microbiota-mediated mechanisms that link diet to intestinal disorders and enteric infections are poorly understood. Our work is focused on discerning these mechanisms and underlying eco-immunological processes via colonic mucus barrier–gut microbiota interactions.
