Exxon Valdez oil spill - Wikipedia

Despite the efforts undertaken to stabilize the vessel and prevent further spillage of oil, more than 250,000 barrels of oil were lost in just a short period of time. Exxon and the U.S. Coast Guard began a massive cleanup effort that eventually involved more than 11,000 Alaskan residents and thousands of Exxon and contractor personnel.

The Valdez oil spill | ExxonMobil

Decades after one of the worst environmental disasters in United States history, oil still clings to some beaches in the region. In the aftermath of the Exxon Valdez spill, Ocean Conservancy—then called Center for Marine Conservation—joined with others to make shipping safer in Alaska and prevent another devastating accident. Back then, we advocated for tighter regulations, like requiring double-hulled oil tankers in United States waters and increased corporate liability for oil spills.

Preventing Another Exxon Valdez Disaster - Ocean Conservancy

On March 24, 1989 the oil tanker Exxon Valdez ran aground in Prince William Sound, Alaska, spilling 11 million gallons of oil. The ecologically sensitive location, season of the year, and large scale of this spill resulted in one of the largest environmental disasters in U.S. history. Exxon settled in 1991 with funds disbursed in three discrete parts: criminal plea agreement (\$25 million), criminal restitution (\$100 million), and civil settlement (\$900 million).

The Exxon Valdez oil spill occurred in Prince William Sound, Alaska, on March 24, 1989. The Exxon Valdez, an oil tanker bound for Long Beach, California, departed from the Trans Alaska Pipeline terminal at 9:12 pm March 23, 1989.

Exxon Valdez Case Study - LawAspect.com

The Exxon Valdez and Deepwater Horizon spills taught us that a big oil spill is all but impossible to clean up effectively. Mechanical recovery of spilled oil using booms and skimmers is woefully inefficient even under the best of conditions, and likely won't work at all in icy Arctic waters or when it settles on the seafloor.

Exxon Valdez: 29 Years Later - Ocean Conservancy

While there is no question that the Exxon Valdez spill was an unfortunate, and in some ways, tragic incident, it is also clear that it provided a necessary impetus to reexamine the state of oil spill prevention, response, and cleanup. One result was the passage of the Oil Pollution Act of 1990 by the U.S. Congress. Many states responded in similar fashion by tightening or completely restructuring oversight of oil production and transportation.
