Physical development. Your newborn gains about 0.7 oz (20 g) a day, or about 4 oz (113 g) to 8 oz (227 g) a week in the first month. He or she grows about 1 in. (2.5 cm) to 1.5 in. (3.5 cm) in length by age 1 month. **Cognitive development.** Newborn thinking begins with simple inborn responses to needs. **Emotional and social development.** Your newborn immediately initiates interaction with you—for example, by moving his or her arms and legs—and expresses himself or herself.

Growth and Development, Newborn | Michigan Medicine

At age 1 month, your baby will prefer to look at bold patterns in sharply contrasting colors or black-and-white. By around age 2 months, your baby's eyes will become more coordinated, allowing for tracking an object. Soon your baby will begin to recognize familiar objects and people at a distance. **Communication.**

Infant development: Birth to 3 months - Mayo Clinic

The last development stage in baby's first year is quite a transition. They aren't an infant anymore, and they might look and act more like a toddler . But they are still a baby in many ways.

Growth And Development Handbook Newborn Through Adolescent ...

Your newborn may want different amounts each day. The amount of formula or breast milk your newborn drinks may change with each feeding and each day. The amount your baby drinks depends on his or her weight, how fast he or she is growing, and how hungry he or she is. Your baby may want to drink a lot one day and not want to drink much the next.

Normal Growth and Development of Newborns - What You Need ...

Your baby's growth and development during the first year is both delightful (Those coos! Those cuddles!) and dizzying (with all the crying and feeding and diapering, you've got your hands full). Here's your guide to your baby's first year and all its major milestones (first smile, giggle, step, and words), challenges (colic and teething and diaper rash, oh my!) and more.
