Manual testing in Test Manager. Azure Test Plans or the Test hub in Azure DevOps Server (see Web portal navigation) provides a rich test management solution for teams that need advanced manual testing capabilities. It includes all the capabilities required for the testing lifecycle - including test planning, authoring, execution, and tracking.

Exploratory and manual testing overview - Azure Test Plans ...

Microsoft Test Manager (MTM) is the “rich client” for QA and Manual Testing that hooks in to TFS. It’s been around for a long time and while it’s a great tool, it’s infamous for having a difficult and confusing user interface mostly because it had two missions that were only loosely related.

Microsoft Test Manager is pretty much done. What’s missing ...

Create test cases. If you haven't already, create a test plan and requirement-based test suites. Select a requirement-based test suite. In the right-hand pane, choose + (New) and then choose New test case. The test suite shown here was created from a User Story work item in the team's backlog board. When you add
