Chapter 16 Evolution Of Populations Study Guide Answers

Population genetics is the study of the allele frequency distribution and change under the influence of the four evolutionary forces: natural selection, genetic drift, mutation, and gene flow. NO, individuals don't evolve. Only populations can evolve!!

Chapter 13 - Evolution Study Guide Answers

The collection of all of the genes in a population. 17. How does diversity affect natural selection or evolution? The more diverse a population is, the more likely that some will survive via natural selection. Those survivors will shape the new population - evolution. 18. Genetic variability leads to microevolution.
