the time of the asteroid strike that ended the age of dinosaurs 65 million years ago, to the present day. Flannery describes the development of North America's deciduous forests and other flora, and tracks the immigration and emigration of various animals to and from Europe, Asia, and South ...

The Eternal Frontier: An Ecological History of North ...

Reading The Eternal Frontier might be the closest you'll get to taking a class from Tim Flannery--and that alone makes it an opportunity just too good to pass up. This ambitious retelling of North America's dramatic ecological history grew out of a course that Flannery taught at Harvard surveying the continent's ancient past up to its tumultuous near-present: from the extraterrestrial "death-dealing visitor" that struck 65 million years ago all the way through to the tidal invasions ...

The eternal frontier : an ecological history of North ...

Eternal Frontier is a marvelous read, lively, insightful, fast - well, you have to go fast to cover 65 million years in 357 pages. And, boy, does Flannery cover the territory. A student of the animal kingdom, he has covered a lot of physical territory in his career, studying the remains of extinct species and searching for undescribed living ones in the forests of New Guinea.

The eternal frontier : an ecological history of North America and its peoples. [Tim F Flannery] -- A paleontologist offers an ecological tour of North America, from the asteroid strike that killed the dinosaurs sixty-five million years ago to the present.

The eternal frontier : an ecological history of North ...

Tim Flannery's The Eternal Frontier is the ground-breaking sequel to The Future Eaters, which changed the way we think about ecological history. Now Flannery tells the astonishing story of North America from the day 65 million years ago when a meteor ten kilometres wide smashed into the Gulf of Mexico, ending the age of dinosaurs and devastating the continent.

The Eternal Frontier on Apple Books

In The Eternal Frontier, Tim Flannery starts his ecological history of North America with the major asteroid impact near the Yucatan 65 million years ago. He writes of the catastrophe with great verve, and the book becomes quite a page-turner.
