RFID Programming Guide - Zebra Technologies

There are two major differences between ZPL II and Standard ZPL. 1. With ZPL II, all data fields are formatted as received. In Standard ZPL, the data fields are not processed until after the ^XZ (End Format) instruction is received. 2. Many new ZPL II commands (instructions) have been added. In order to take advantage of ZPL II, it is mandatory that when the

ZPL Programming Guide 2 do not specify how the computation is performed concurrently. Nor do they insert interprocessor communication. The ZPL compiler is responsible for producing parallel object code from the source program, and for taking care of all details necessary to exploit the target parallel computer.

A Programmers Guide to ZPL - University of Washington

Zebra Programming Language is a page description language from Zebra Technologies, used primarily for labeling applications. The original language was superseded by ZPL II, but it is not fully compatible with the older version. Meanwhile, ZPL II is emulated by many label printers of various producers. Later, the Zebra BASIC Interpreter was integrated into printer software, which is seen as an advancement to ZPL II by the producer and is ANSI BASIC oriented. Primarily, it is intended to avoid a r
